Prioth[®]

PRINOTH FLEET MANAGEMENT

THE ENTIRE SKI RESORT
VEHICLE FLEET UNDER CONTROL

PRINOTH's comprehensive fleet management system provides **data transmission and tracking for snow groomers of any manufacturer**. Based on the most modern data transfer technology, the new PRINOTH system supplies **information in real time for vehicle localisation and running**. With this system from one provider, you have more planning security, you can raise the efficiency of machine use, and simply lower the costs.

MOST MODERN, SAFE AND PRECISE TRANSMISSION TECHNOLOGY

**SIMPLE AND RAPID INSTALLATION OF THE HARDWARE AND SOFTWARE:
INSTALLATION & ACTIVATION IS UNDERTAKEN
COMPLETELY BY PRINOTH – EVEN DATA HANDLING**

VEHICLE POSITIONING VIA SATELLITE

**EXACT LIVE-VEHICLE MONITORING:
VEHICLE DATA DIRECTLY FROM CAN-BUS**

DATA EVALUATION ACCORDING TO: VEHICLE / SLOPE / DRIVER

15%*
INCREASE IN
EFFICIENCY

12%*
COST SAVINGS

11%*
HIGHER GROOMING
PERFORMANCE

SAVINGS AT THE PRESS OF A BUTTON

Efficient Management requires the **correct information**: vehicle status, working time, position and speed, engine and vehicle figures with status of winches, tillers und lighting are transmitted in real time and displayed in PRINOTH's own SNOW HOW software.

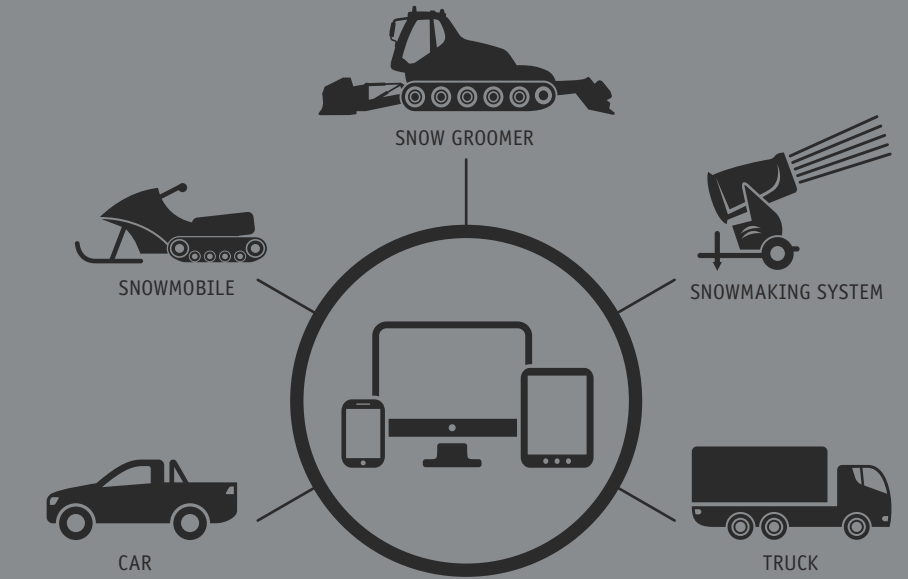

The equipment at once reveals the first great plus point: The customer needs to be concerned neither about the installation of a regional server, nor about the storage and transmission of data, and can thus **fully concentrate on fleet management in the moment**.

**MORE EFFICIENT VEHICLE OPERATION FOR LONGER
LIFE – LOADS/OVERLOADS ARE DETECTED**

**NO ADDITIONAL EXPENSES: INSTALLATION, STORAGE
AND TRANSMISSION OF DATA ALL BY PRINOTH**

**The figures shown here relate to the past experience of SNOW HOW users. The actual savings may vary depending on the size and organization of the ski resort.*

- + CLEAR USER INTERFACE
- + DATA RETRIEVAL POSSIBLE AT ANY TIME (LIVE OR SUBSEQUENTLY)
- + RETRIEVABLE FROM VARIOUS DEVICES: **DESKTOP, TABLET, MOBILE**
- + TROUBLE-FREE DATA TRANSFER AND STORAGE
- + USER-FRIENDLY VIEW AND SIMPLE DATA
- + REPORTS CAN BE EXPORTED AS EXCEL-DATA

SNOW HOW 1 PLATFORM FOR ALL DATA

All information is retrievable via a single user interface. **Switching between different programmes** is thus no longer necessary, and at the same time continuous workflow is ensured. With this system, the snow depth measurement software of PRINOTH and Leica Geosystems can be simply combined. Moreover, a change in **view of the snow-making machines** is available with one click.

User friendliness comes first and foremost in SNOW HOW software by PRINOTH. The **clear presentation guarantees intuitive operation** of all functions.

MONITOR ALL VEHICLES IN YOUR SKI AREA

With precise data capture and individually scalable evaluation, the system compiles the necessary information exactly for **vehicle and driver performance optimization**. These contain, amongst other things, access to the distribution of operating conditions and times and thus more **planning security**: they also know the position of your vehicle, and if it is being economically used.

ONE PARTICULAR BONUS: Not only snow grooming vehicles, but also snowmobiles and passenger vehicles can be equipped independently with **FLEET MANAGEMENT** by the manufacturer. Thus the **ski resort's complete vehicle fleet can be included, fully managed and optimized**.

- + IMPROVEMENT OF TRIP PLANNING AND OPERATIONAL PROCEDURES
- + REDUCTION IN IDLE TIME AND FUEL CONSUMPTION
- + HIGHER GROOMING PERFORMANCE PER HOUR
- + REDUCED DOWNTIME
- + QUICKER TRANSFER OF KNOWLEDGE TO NEW DRIVERS
